Introduction to ATUS-X Extract Builder

American Time Use Survey Extract Builder

What the ATUS-X does

Makes complex time diary data from the ATUS easier to use

- Available for free online
- Easy to use
 - Simplify use of complex data
 - Time use variable creation
- Comprehensive online documentation
- Integration makes analyzing change over time easier
- Data extract system allows you to specify years and variables relevant to your research
- Datasets are available in the main Statistical Packages
- User support is available by e-mail to help you as needed

Plan for this session

- Web-based dissemination system demo
 - Step 1: choosing years, people, data format
 - Step 2: selecting Household and Person level variables
 - Step 3: selecting Activities and Who level variables
 - Step 4: creating and selecting time use variables
 - Step 5: reviewing and submitting extracts
 - Step 6: downloading and revising extracts
 - Managing time use variables
- More information on selected topics
 - Types of people in the data
 - Rectangular versus hierarchical data
 - Integration: why we do it and how it relates to the user experience
 - ATUS versus CPS variables
 - Using the FAQ as a reference

American Time Use Survey Data Extract Builder

ATUS-X is a project dedicated to making it easy for researchers to use data from the American Time Use Survey (ATUS). The ATUS is an ongoing time diary study that is funded by the U.S. Bureau of Labor Statistics and fielded by the U.S. Census Bureau. The goals of the ATUS-X project are:

- To collect and preserve ATUS data and documentation
- · To harmonize the data from different years of data collection
- To make it easy to create data files containing the ATUS variables a user needs

Time is our scarcest resource...use it wisely!

Register required

- Free
- It is necessary to submit extracts
- Provide information about your affiliation
- Short description of your research interest
- Login is also necessary to create TUV
- New user can Login automatically after registering, you don't have to wait for approval

Types of People

- ATUS respondents
 - Time diary data for one 24-hour period
 - Last month of CPS data
 - Updates from CPS
- Members of ATUS respondent households
 - Last month of CPS data
 - Updates from CPS
- ATUS non-respondents
 - Survey methodology questions
 - Last month of CPS data
- Members of ATUS non-respondent households
 - Last month of CPS data
- NOTE: not only time use, but data from two time points for a large number of variables!

Types of Data

- Rectangular (default)
- Preferred by most researchers
- Ready to analyze
- Person records ONLY
- Activity and Who record information is used to create time use variables—you never actually see them

- Hierarchical
- Four record types
 - Household, Person, Activity,
 Who
- Select variables for each record type if you want them to be included
- More difficult to work with, but better for creating LOTS of time use variables that are only slightly different or are too complicated to do in the system
- Necessary for analyzing activity sequences

Rectangular Data: What It Looks Like

Hierarchical Data: What It Looks Like

ATUS versus CPS Variables

- In most cases, CPS variables indicated by _CPS8:
 - ATUS interview variables: AGEYCHILD, RELATE
 - Final CPS interview variables (2-5 months prior to ATUS interview): AGEYCHILD_CPS8, RELATE_CPS8
- Not all information updated during ATUS interview
 - In cases where information is not updated and is unlikely to have changed, we generally do not append _CPS8 to the variable name
 - e.g. RACE, MARST, others
- Quick shortcut to determine whether an individual was in the household at the time of ATUS, CPS, or both: PRESENCE

Integration: Relationship to ATUS respondent
